

RICHARD ANDERSON

VP · AI Engineering & Agentic Workflow Automation

Richard.torieal@gmail.com | (863) 513-5131 | Dallas–Fort Worth, TX | LinkedIn: /in/richardanderson

Technical leader with 8+ years bridging engineering, product strategy, and business outcomes across Fortune 50 institutions. Track record of translating complex systems into clear decisions for stakeholders—from C-suite to end users. Seeking client-facing, high-influence roles—Solutions Architect, Technical Product Lead, or Strategic Advisor—where deep technical fluency drives design decisions without day-to-day coding.

EXPERIENCE

Vice President, AI Engineering & Agentic Workflow Automation

JPMorgan Chase · Global Finance Technology | Jul 2024 – Present · Plano, TX

- Pioneered an **AI-only engineering model**—replacing conventional SDLC hand-offs with autonomous agent harnesses that generate designs, estimations, and end-to-end implementation.
- Owned **Data Access Architecture** for global capital reporting; re-architected core data service into a resilient, database-agnostic platform (Databricks · AWS · Python), eliminating critical errors and manual intervention.
- Partnered with Product, Business, and Cyber to define requirements and deliver **day-one data insights** on AI-generated outputs meeting firm-wide compliance bars.
- Alternate Manager: coached junior engineers on agentic patterns, prompt engineering, and responsible AI deployment.

Senior Software Engineer · Sr. Software Product Development

Capital One · Full-time | Aug 2021 – Jan 2025 · 3 yrs 6 mos

- Owned auto-financing products end-to-end—underwriting **millions of vehicles** on a secure, cloud-native dealer platform supporting 1M+ transactions.
- Led **Tesla OEM partnership** integration, increasing quarterly loan applications by 4,500 and expanding EV financing footprint.
- Acted as product owner: prioritized backlog, translated business goals into engineering roadmaps, and coordinated cross-functional delivery across design, data, and compliance.

Principal Product Owner

Northrop Grumman · Full-time | May 2017 – Aug 2021 · 4 yrs 4 mos · Melbourne, FL

- Led a 6-person agile team building a **classified cloud testing platform** for sensitive defense data; owned roadmap, sprint planning, and stakeholder demos.
- Drove product redesign in Angular 10 / .NET—improving UX for mission-critical workflows and reducing support tickets.
- Designed and validated secure networking architectures for encrypted communications systems supporting national-security programs.

EDUCATION

Florida International University

M.S. Computer Engineering – Networks & Security 2019 · Summa Cum Laude

Florida State University

B.S. Computer Engineering 2017 · Academic Scholarship

SKILLS & CERTIFICATIONS

AI / Agentic Systems	LLM Orchestration · Multi-Agent Harnesses · Agentic SDLC · Prompt Engineering · AI-Augmented Architecture
Cloud & Data	AWS (Solutions Architect Certified) · Azure Fundamentals · Databricks · Python · SQL
Engineering	Full-Stack (Java · Angular · .NET) · System Design · Database-Agnostic Architecture · Security Patching
Product & Leadership	Product Ownership · Agile / SAgE · Cross-functional Stakeholder Management · Technical Coaching
Certifications	AWS Solutions Architect – Associate (Pearson VUE, Feb 2022) · Microsoft Azure Fundamentals
